CONTENTS

Special Issue: ***100th Volume Celebration Issue.***

Preface ix
Some reflections on the early days of mass spectrometry at the University of Minnesota
A.O. Nier (Minneapolis, MN, U.S.A.) 1
How far the computer can be avoided in mass spectrometer design
A.J.H. Boerboom (Amsterdam, The Netherlands) 15
High performance mass spectrometers of magnetic sector type
H. Matsuda (Takarazuka, Japan) 31
Source–analyser coupling in the quadrupole mass filter
P.H. Dawson (Ottawa, Ont., Canada) 41
Metal-vapor vacuum arc as a primary ion source for secondary ion mass spectrometry
B.-H. Wang, I.J. Amster and F.W. McLafferty (Ithaca, NY, U.S.A.) and I.G. Brown (Berkeley, CA, U.S.A.). 51
Radial velocity distributions of secondary ions ejected in electronic sputtering of organic solids
D. Fenyö, A. Hedin, P. Håkansson and B.U.R. Sundqvist (Uppsala, Sweden) 63
Application of the time-of-flight mass spectrometer to monitor time-dependent behaviour following pulsed laser heating of solids
D. Price (Salford, U.K.), K.A. Lincoln (Sunnyvale, CA, U.S.A.) and G.J. Milnes (Salford, U.K.) 77
Negative ion formation by field ionization—studied by field ion microscopy and appearance energy measurements
F.W. Röllgen, K.H. Ott, S. Raida, R. Schmitz and R. Stoll (Bonn, F.R.G.) 93
Collision-induced decomposition of ions
J. Bordas-Nagy and K.R. Jennings (Coventry, U.K.) 105
An energy-resolved study of the fragmentation of protonated polyfluoro- and polychloro-benzenes
M. Tkaczyk and A.G. Harrison (Toronto, Ont., Canada) 133
Electron impact ionization cross sections of molecules. Part I. Experimental determination of partial ionization cross sections of SF_6: a case study
D. Margreiter, G. Walder, H. Deutsch, H.U. Poll, C. Winkler, K. Stephan and T.D. Märk (Innsbruck, Austria) 143
Electron impact ionization cross sections of molecules. Part II. Theoretical determination of total (counting) ionization cross sections of molecules: a new approach
D. Margreiter, H. Deutsch, M. Schmidt and T.D. Märk (Innsbruck, Austria) 157
Translational and electronic energy dependence of $S^+ + H_2$ (D_2, HD) $\rightarrow SH^+$ (SD^+) + H (D): spin-allowed and spin- forbidden pathways
G.F. Stowe, R.H. Schultz, C.A. Wight and P.B. Armentrout (Salt Lake City, UT, U.S.A.) . 177
Beam scattering study of the charge transfer process N^{2+} (He, He^+)N^+ at low collision energies
M. Sadílek, J. Vančura, M. Fárník and Z. Herman (Prague, Czechoslovakia) 197
Collisions of polyatomic ions with surfaces
R.G. Cooks, T. Ast and Md.A. Mabud (West Lafayette, IN, U.S.A.). 209
Applications of multiphoton ionization mass spectrometry: small protected nucleosides and nucleotides
J. Lindner, J. Grotemeyer and E.W. Schlag (Garching, F.R.G.) 267
Microderivatization of peptides by placing a fixed positive charge at the N-terminus to modify high energy collision fragmentation
J.E. Vath and K. Biemann (Cambridge, MA, U.S.A.). 287

Determination of interglycosidic linkages in disaccharides by high performance tandem mass spectrometry
B. Domon, D.R. Müller and W.J. Richter (Basle, Switzerland). 301
Mass spectrometric studies of the reactivity of antimony trioxide with halogenated flame retardants in the pyrolysis of plastics
P.J. Gale (Princeton, NJ, U.S.A.) 313
Laboratory-frame and rotating-frame ion trajectories in ion cyclotron resonance mass spectrometry
M. Wang and A.G. Marshall (Columbus, OH, U.S.A.) 323
Theory of ion cyclotron resonance mass spectrometry: resonant excitation and radial ejection in orthorhombic and cylindrical ion traps
P.B. Grosshans and A.G. Marshall (Columbus, OH, U.S.A.) 347
A scaling technique for studying the dynamics of high mass ions in Fourier transform mass spectrometry: a preliminary report
D.L. Rempel, R.P. Grese and M.L. Gross (Lincoln, NE, U.S.A.). 381
A new instrument for measuring the radiative lifetimes and for studying the state-selected bimolecular reaction chemistry of small ionic species
C.G. Beggs, C.-H. Kuo, T. Wyttenbach, P.R. Kemper and M.T. Bowers (Santa Barbara, CA, U.S.A.) 397
Polyatomic ion–molecule radiative association: theoretical framework and predictions: observations of $NO^+ + C_6H_5CN$ as an example
R.C. Dunbar (Cleveland, OH, U.S.A.) 423
Infrared spectra of butenyl anions: multiphoton electron detachment as a photochemical probe of isomeric structures of gas phase anions
C.A. Wight (Salt Lake City, UT, U.S.A.) and J.L. Beauchamp (Pasadena, CA, U.S.A.). . . 445
Evaporative corrections to high-pressure ionic clustering data
C.E. Klots (Oak Ridge, TN, U.S.A.) 457
On the use of distorted Franck–Condon factors in the interpretation of neutralization–reionization experiments
J.C. Lorquet and B. Leyh-Nihant (Liège, Belgium) and F.W. McLafferty (Ithaca, NY, U.S.A.) 465
Identification of the transient benzonitrile *N*-sulfide by flash-vacuum pyrolysis and neutralization–reionization mass spectrometry
A. Maquestiau, R. Flammang and M. Plisnier (Mons, Belgium), C. Wentrup, P. Kambouris and M.R. Paton (Brisbane, Qld., Australia) and J.K. Terlouw (Hamilton, Ont., Canada) 477
New developments in charge separation mass spectrometry
J.H.D. Eland and D.A. Hagan (Oxford, U.K.). 489
Multireference-configuration interaction (MR-CI) calculations on HS^{2+} and experimental observation via electron impact ionization of H_2S
P.J. Miller, S.A. Rogers, J. Senekowitsch, S.V. ONeil and S.R. Leone (Boulder, CO, U.S.A.), H.-J. Werner (Bielefeld, F.R.G.) and P.J. Knowles (Brighton, U.K.) 505
The gas phase chemistry of the methyl carbamate radical cation $H_2NCOOCH_3^+$: isomerization into distonic ions, hydrogen-bridged radical cations and ion–dipole complexes
G. Schaftenaar, R. Postma and P.J.A. Ruttink (Utrecht, The Netherlands), P.C. Burgers (Amersfoort, The Netherlands), G.A. McGibbon and J.K. Terlouw (Hamilton, Ont., Canada) 521
Unimolecular and bimolecular reactions of the β-distonic ion $^{\cdot}CH_2–CH_2–O–CH_2^+$ and its deuterated derivatives
D. Wittneben and H.-F. Grützmacher (Bielefeld, F.R.G.) 545
Intramolecular hydrogen–deuterium exchange in isomeric methyl ethyl esters of phenylmaleic, -fumaric, and -succinic acids under chemical ionization: low energy CID study and geometrical requirements of the exchange
A. Mandelbaum (Haifa, Israel), D.R. Müller and W.J. Richter (Basle, Switzerland) and I. Vidavsky (Haifa, Israel) 565
Energy dependence of H-exchange versus C–C bond formation in the complex $[CH_3OH\ CH_2=CH_2^{+\cdot}]$: unimolecular and bimolecular studies
D.J. McAdoo, M.S. Ahmed, C.E. Hudson and C.S. Giam (Galveston, TX, U.S.A.) 579

Photofragmentation of toluene in a Fourier transform-mass spectrometer in the visible and infrared range
M. Bensimon, T. Gäumann and G.-H. Zhao (Lausanne, Switzerland) 595
Low pressure ion/molecule clustering reactions towards cationic dimers
A.J.R. Heck, T. Drewello, L.J. De Koning and N.M.M. Nibbering (Amsterdam, The Netherlands) 611
Studies of the chemistry of large semiconductor cluster ions
U. Ray, M.F. Jarrold, K.M. Creegan and J.E. Bower (Murray Hill, NJ, U.S.A.) 625
Gas phase ion/molecule reactions in monogermane–hydrocarbon mixtures: a comparative Fourier transform mass spectrometry and chemical ionization mass spectrometry study
P. Benzi, L. Operti, G.A. Vaglio and P. Volpe (Turin, Italy), M. Speranza (Viterbo, Italy) and R. Gabrielli (Rome, Italy) 647
The association reactions of Pb^+ ion with CH_3OH and CH_3NH_2 in the gas phase
B.C. Guo and A.W. Castleman, Jr. (University Park, PA, U.S.A.) 665
Proton transfer reactions of $C_2H_2^{+\cdot}$: the bond energy D_0 (C_2H–H)
M. Iraqi, A. Petrank, M. Peres and C. Lifshitz (Jerusalem, Israel) 679
The heats of formation of cyclic and linear $C_3H_2^{+\cdot}$
S.D. Prodnuk, C.H. Depuy and V.M. Bierbaum (Boulder, CO, U.S.A.) 693
Determination of rate constants for low pressure association reactions by Fourier transform-ion cyclotron resonance spectrometry
J.J. Fisher and T.B. McMahon (Waterloo, Ont., Canada) 701
Chemistry initiated by atomic silicon ions in the gas phase: formation of silicon-bearing ions and molecules
D.K. Bohme (North York, Ont., Canada) 719
A selected ion flow tube study of the reactions of F^+, Cl^+, Br^+ and I^+ with several molecular gases at 300 K
C.A. Mayhew and D. Smith (Birmingham, U.K.) 737
Electron capture induced processes in molecules and molecular aggregates
R. Hashemi, A. Kühn and E. Illenberger (Berlin, Germany) 753
Collisional activation of intramolecular nucleophilic displacement reactions: the formation of acetolactone from dissociation of α-haloacetate negative ions
S.T. Graul and R.R. Squires (West Lafayette, IN, U.S.A.) 785
Detection and characterization of competitive processes giving rise to isomeric products in the reactions of Fe^+, Co^+ and Ni^+ with *n*-butyl cyanide
K. Eller, W. Zummack and H. Schwarz (Berlin, F.R.G.) 803
